

Matt Shea Named to MixMode's Board of Advisors

Gaming and consumer technology CEO brings extensive product development experience

Santa Barbara, Calif., April 30, 2019 – FOR IMMEDIATE RELEASE -- [MixMode™](#), the leading AI-driven Network Monitoring and Forensics platform, today announced that Matt Shea has joined MixMode's Board of Advisors.

"Matt is an extremely creative technology leader with significant experience across numerous business models," said John Keister, CEO of MixMode. "Matt has jumped right in and provided us with critical insights on our product roadmap for AI-driven network monitoring and alert management. We feel very fortunate to have him on the team as we drive growth in 2019."

Shea most recently was CEO of WildTangent, a leading worldwide, cross-device technology company focused on the distribution and monetization of mobile and online apps that has delivered over 20 billion apps as well as services and technology to companies including AT&T, T-Mobile, Hewlett-Packard, Samsung, and ACER. Prior to taking over as CEO, Shea led large initiatives at the company, including creating a digital currency system to make purchasing games easier and establishing a new form of advertising which allows WildTangent's sponsors to be visible to more gamers. Shea has spent the past 22 years in technology, both designing and leading product development. He holds numerous patents in the area of digital currency, advertising and consumer technology.

Shea began his career at Sony Interactive Studios while earning a Bachelor of Science degree in computer science from the University of California at San Diego. A proud resident of the Pacific Northwest, he has also been named to the Puget Sound Business Journal's "40 Under 40" list.

"I am excited to dig in with the MixMode team on the applications for their proprietary, [third-wave AI](#)," said Shea. "I believe their first killer app is security, but the opportunities for their core technology could very well extend beyond security."

About MixMode

[MixMode](#) is the first to bring a third-wave, context-aware AI approach that automatically learns and adapts to dynamically changing environments. MixMode better understands the network behavior, adapts to baseline changes and enables both misuse detection and anomaly detection, as well as predictive maintenance. The company's PacketSled platform is used by enterprises and MSSPs for real-time network analysis, threat hunting and incident response. MixMode reduces the resources required to respond to persistent threats, malware, insider attacks, and nation state espionage efforts. Based in Santa Barbara with an additional office in San Diego, the company is backed by investors including Keshif Ventures and Blu Venture Investors. Please visit us at <https://mixmode.ai/>.
