

## PacketSled Recognized by SC Media as Finalist for Best Computer Forensic Solution

*PacketSled was Selected as a 2019 Trust Award Finalist in the Category of 'Best Computer Forensics Solution' by SC Media for the Third Year in a Row*

**Santa Barbara, Calif.**, January 17, 2019 - [PacketSled](#), the leading Network Monitoring and Threat Intelligence platform, has been recognized as a Trust Award finalist in the Best Computer Forensic Solution category for the 2019 SC Awards. The finalists and winners for the Trust Awards are chosen by an expert panel of judges with extensive knowledge and experience in the cybersecurity industry. Winners will be announced at the SC Awards ceremony on March 5, 2019 in San Francisco.

“Every new year brings with it an unpredictable mix of adversity and opportunity for information security professionals,” said Illena Armstrong, VP, editorial, SC Media. “In 2018, we watched as ransomware took down entire city governments, popular online platforms were accused of mishandling user data, and technology giants announced an unprecedented industry-wide effort to solve the Spectre and Meltdown CPU vulnerabilities. Through it all, this year’s SC Awards finalists found ways to break boundaries, overcome challenges and contribute fresh new ideas to the world of cybersecurity.”

“We are honored to be recognized for the third consecutive year in this category by SC Magazine,” said Dr. Igor Mezic, CTO at PacketSled. “We have a big year ahead of us in terms of launching more innovative, AI-driven capabilities in our platform.”

PacketSled empowers organizations with an AI-driven platform that delivers network monitoring, network forensics and incident response. In the face of countless external network security threats and the vulnerability most organizations feel towards insider attacks (ninety percent according to [one study](#)), PacketSled’s context-aware AI rapidly identifies potential threats to critical data systems before significant damage is done.

PacketSled also was recently honored by SC Media with inclusion in its annual Innovators special, which calls out top cybersecurity technologies. As part of the 2018 Innovators special, which is produced by the SC Lab product reviews team, the company also was entered in the "Hall of Fame" after having been named an Innovator by SC Media three years in a row. “In a vast sea of security solutions and services, the Trust Award finalists stand out for their cutting-edge, high-quality features and user-friendly policies,” added Armstrong of SC Media. “PacketSled has emerged as true leader in its space and has earned this honor.”

Now in its 22nd year, SC Awards is recognized as the industry gold standard of accomplishment for cybersecurity professionals, products and services. With the awards, SC Media recognizes the achievements of cybersecurity professionals in the field, the innovations happening in the vendor and service provider communities, and the vigilant work of government, commercial and nonprofit entities. Vendors and service providers who offer a product and/or service for the commercial, government, educational, nonprofit or other industries are eligible for the SC Awards’ Trust Award category.

The SC Awards gala honoring the winners attracts top professionals in the cybersecurity community and provides an invaluable opportunity for networking. To register for the 2019 SC Awards gala, please visit <https://scawards2019.splashthat.com/>

#### **About PacketSled**

PacketSled is an AI-driven network monitoring platform used by security teams globally. Leveraged by enterprises and MSSPs for real-time network analysis and incident response, the platform leverages continuous stream monitoring and retrospection to provide network forensics and security analytics.

Security teams can integrate PacketSled into their orchestration engine, SIEM, or use PacketSled independently to dramatically reduce the resources required to respond to persistent threats, malware, insider attacks and nation state espionage efforts. Based in Santa Barbara and San Diego, the company is backed by investors including Keshif Ventures and Blu Venture Investors.
